## **PROFILE SUMMARY**

Dedicated and compassionate **Community Health and Development Specialist** with a diploma in Community Health and Development and comprehensive training in **First Aid, health and care, Family Planning, Meal Planning, Counselling, infection prevention, safety** and **Caregiver**. Skilled in providing health education, promoting preventive care, and implementing community-based health programs to improve well-being.

Experienced in clinical attachment at **Kenyatta National Hospital**, where I gained practical knowledge in patient care, public health interventions, and health care system management. Recognized for excellent organizational and leadership skills as a former **class representative** during my studies, fostering effective communication between students and faculty.

Proficient in creating supportive documents and health tracking tools, with a focus on managing communicable and non-communicable diseases at the community level. I aim to leverage my expertise and passion for health care to support NGOs or health care organizations in addressing global and community health challenges.

## **SKILLS**

### **1. Community Health and Development**

- Planning and implementing community health programs.

- Educating communities on disease prevention and health promotion.
- Conducting health assessments and needs evaluations.

## **2. Clinical and Practical Experience**

- Hands-on experience during attachment at Kenyatta National Hospital.
- Patient care and support in diverse health conditions.
- Monitoring and managing communicable and non-communicable diseases.

## **3. First Aid and Emergency Response**

- Certified in first aid procedures with the Red Cross.
- Responding to medical emergencies and providing immediate care.

## **4. Counselling and Caregiving**

- Providing emotional and psychological support to individuals and families.
- Assisting patients with daily living and healthcare needs.
