ABOUT ME

Dear Sir,

I hereby submit an application for the above subject post as per your requirement.

I have operated consecutively for the past two decades working in different capacities as follows; Technician, Service adviser, Parts Sales representative as well as a Service administrator.

I believe I can handle the tasks involved given that I have operated in the front office performing direct and online sales interacting with clients taking atleast five years in direct contact with both individual customers and corporates.

I have also been pursuing daily cash sales and inventory analysis as well as reorder point tracking for the warehouse. I had also been pursuing the imports for the (VOR), backorders. I have also been generating sublets in the system for the locally sourced items and outsourced jobs.

Another major task I have undertaken is dealing with dealers and suppliers within my region including Nairobi, Central, Eastern and parts of riftvalley of Kenya.

Firstly I have gained skills such as problem solving, leadership, negotiation, invoicing and report writing among others thus rising from technician to Service administrator all of which are within automotive industry.

Secondly, I have also gained skills in debt collection in a bid for up-sale as well as doing telesales. I have officially worked using computer on emails, Microsoft Excel analysis, Microsoft word Ms power point as well as other enterprise resource planning (ERP), such as SAP, Ramco, road base and Autoline during the past recent years.

I am looking to secure a position in an organization, where I can bring my strategic and immediate value and develop my skill set.

Attached herewith are the curriculum vitae.

Kindly refer.

Kind regards,
Julius.
