**EXPERIENCE**

**REGISTERED NURSE – Toror Hospital and Clinic**  
Kapenguria, January 2025 - Present

- Conducting comprehensive patient assessments, including physical examinations, for patients.
- Administering prescribed medications and treatments meticulously, ensuring correct dosage, route, and patient response monitoring, achieving zero medication errors to date.
- Developing and implementing individualized nursing care plans, addressing specific patient needs and promoting optimal recovery.
- Collaborating seamlessly with multidisciplinary healthcare teams (doctors, specialists, allied health) to ensure coordinated and holistic patient care.

- Providing essential health education and counseling to patients and their families on disease management, medication adherence, and preventive health measures.
- Managing medical emergencies effectively, assisting in patient stabilization and coordinating with the medical team for critical interventions.
- Maintaining accurate and confidential patient medical records, ensuring comprehensive documentation of all care provided and patient progress.
- Ensuring strict adherence to hospital policies, protocols, and ethical guidelines, maintaining the highest standards of care.
- Participating in continuous professional development activities and quality improvement initiatives to enhance clinical practice and patient safety.
- Overseeing patient admissions and discharges, ensuring smooth transitions of care and thorough patient education on follow-up.

### **LOCUM — Murang'a Level 5 Hospital**

*May 2024 - December 2024*

- Provided direct nursing care across Medical, Surgical wards, Labour ward, Casualty, and MCH units, managing patients.
- Assessed patient conditions, administered medications, and implemented treatment plans effectively, contributing to positive patient outcomes.
- Managed emergency cases in the Casualty department, performing rapid triage and assisting in patient stabilization.
- Supported mothers through labor and delivery in the Labour ward, ensuring safe birth practices and immediate newborn care.
- Maintained meticulous patient records and charts, ensuring 100% accuracy and compliance with hospital standards.
- Collaborated with a large multidisciplinary team, including doctors and specialists, to ensure coordinated patient care.
- Provided patient education on various health topics, including post-surgical care and maternal health.
- Adhered strictly to infection prevention and control protocols across all rotated departments.

### **STUDENT NURSE — Murang'a county Hospital**

*March 2024 - April 2024*

- Gained hands-on experience in Theatre, assisting with pre- and post-operative patient care and maintaining sterile fields.
- Observed and assisted in renal care procedures, including dialysis, understanding patient management in specialized units.
- Participated in Outpatient Department (OPD) activities, assisting in patient assessments and flow management.
- Assisted in emergency response in Casualty, learning rapid assessment and initial stabilization techniques.
- Gained exposure to Intensive Care Unit (ICU) settings, observing critical patient monitoring and interventions.
- Maintained accurate patient records and assisted with clinical documentation in each rotated department.
- Collaborated with nursing staff, learning about interdisciplinary teamwork in a busy hospital environment.
- Adhered to hospital policies and safety protocols across all clinical rotations.

### **PUBLIC HEALTH NURSE EXPERIENCE — Uasin Gishu County Hospital**

*February 2024 - March 2024*

- Participated actively in public health nursing initiatives, including community health assessments and data collection.

- Assisted in organizing and conducting health education campaigns on prevalent public health issues for community members.
- Gained practical experience in disease surveillance and reporting, contributing to public health data.
- Supported immunization drives, assisting in vaccine preparation and administration under supervision.
- Collaborated with community health workers to identify and address health needs in various settings.
- Learned about environmental health practices and their impact on community well-being.
- Assisted in home visits to follow up on patients and provide health counseling.
- Maintained accurate records of public health interventions and community engagements.

### **STUDENT NURSE — Sagana Health Centre**

*November 2023 – December 2023*

- Conducted community diagnosis activities, identifying prevalent health issues and risk factors in rural populations.
- Participated in community health action planning, assisting in designing interventions to address identified needs.
- Provided essential Maternal and Child Health (MCH) services, including antenatal and postnatal care for mothers.
- Assisted in child immunization programs, ensuring adherence to vaccination schedules in the community.
- Delivered health education talks on hygiene, nutrition, and disease prevention to community members.
- Conducted home visits to follow up on patients and provide continuity of care.
- Maintained accurate records of community interventions and patient interactions.
- Collaborated with local health volunteers and community leaders to implement health programs.

### **STUDENT NURSE — Mathare Hospital**

*February 2023 – June 2023*

- Gained comprehensive psychiatric nursing experience, assisting in the care of patients with various mental health conditions.
- Performed daily Mental Status assessments of patients, contributing to their individualized care plans.
- Ensured that activities of daily living (ADLs) of patients were met, providing assistance with personal hygiene and feeding.
- Involved actively in patient admission and discharge processes within the psychiatric unit.
- Assisted in administering prescribed psychotropic medications, meticulously documenting dosages and patient responses.
- Provided emotional support and therapeutic communication to patients, fostering a supportive environment.
- Maintained accurate patient records, ensuring confidentiality and compliance with hospital standards.
- Collaborated with the psychiatric nursing team, psychiatrists, and psychologists to ensure coordinated patient care.

### **STUDENT NURSE — Kimbimbi Sub County Hospital**

*March 2022 – August 2022*

- Gained extensive experience in the Maternity ward, assisting in the care of expectant and new mothers.
- Provided comprehensive care in the Newborn Unit, including initial assessment, feeding support, and monitoring of vital signs for newborns.
- Actively participated in Antenatal clinics, assisting in patient assessments, health education, and preparing mothers for delivery.
- Assisted in labor and delivery, providing support to laboring mothers and assisting with safe birth practices.

- Administered medications to mothers and newborns under supervision, ensuring accuracy and patient safety.
- Maintained accurate patient records for maternity and newborn care, ensuring comprehensive documentation.
- Collaborated with the nursing team to ensure coordinated care for mothers and infants.
- Participated in patient education sessions on breastfeeding, newborn care, and postpartum recovery.
