---

Passion-driven and experienced Bio Medical Engineer with a demonstrated history of working in the hospital set-up and health care industry. I'm skilled in Preventive Maintenance of Laboratory, Theatre, laundry, critical care equipment. I brave myself in medical gases as a gas technician as well.

### **EDUCATION AND PROFESSIONAL QUALIFICATION**

- Diploma in Bio-Medical Engineering, Kisiwa Technical Training Institute (KISTTI).
- Kenya Certificate of Secondary Education, St Pius Uriri Boys High School.

### **PROFESSION AND EXPERIENCE**

#### **ALPHA SURGICALS SUPPLIES LTD (2024-PRESENT)**

Joined Alpha Surgicals Supplies Ltd in 2024 and I currently serve as a Biomedical Engineer. I have been able to adapt new technical skills in medical equipment and sales of the same equipment as well as learn new technological ideas in the current market. I have been able to also gain experiences in the dental unit equipment as well as in the laboratory equipment. Below is a series of responsibilities I undertake, experience and skills I have been able to gain;

- Conducting technical training to the sales team staff.
- Installation and commissioning of the dental chairs.
- Troubleshooting and installation of 3-part hematology analyzer.
- Sales on new medical equipment like the dental chairs, hematology analyzers etc
- Contributing to the sales team in critical decision making
- Learning experiences and knowing a well set ups in both diagnostic and research laboratories.
- Developing preventive measures to curb the risk of problem recurrence whenever medical equipment is installed.
- Offering a great training to the end users upon medical equipment installation and when commissioning it
- Gained the better professional ways and terms when approaching customers I meet. I therefore apply KYC rule.
- Contributed on the critical decision making on the importation of a new product which we have never stocked before. This was anesthesia machine, Eshero AM832.
- Conducting repairs on faulty box type centrifuges of both 6 tubes and 8 tubes.
- Preparing the technical specification sheets of all medical products we stock to the sales team. This makes it easier for sales team to understand the complex terms used in simpler ways.

## **VESLAB SUPPLIES LTD (2022-2024)**

Joined Veslab Supplies Ltd in 2022 and I served as the field Bio Medical engineer and Medical Gas technician. I was able to learn and gain more experience as follows;

- Troubleshooting, Installation, Commissioning, Training, Maintenance and Repair of specific equipment as well as supervision of spare parts and consumables inventory and cycle times as per clients order.
- Conducting Validation, Certification and repair procedures for arrange of equipment supplied to our various clients.
- Thoroughly inspecting all equipment and machinery supplied and installed by us (Veslab Ltd) when they are due service.
- Developing preventive measures to mitigate the risk of problem recurrence before heading out to the site to check on the faulty equipment.
- Cultivating a collaborative relationship with personnel (Biomedical Engineer) on the client/user side.
- Analyzing customer issues/ challenges and formulating necessary actions to ensure optimal level of customer satisfaction.
- Inspection of electrical installation.
- Inspecting medical gas leakages before commissioning and handing over the facility.
- Successfully carried out sales on hospital beds like the double crank electric bed.
- Managed to sell the double crank and three crank mattresses 4 by 6 inches and the ripple mattresses.
- Successfully sold and installed the double arm LED ceiling mount theatre light.
- Carried out sales on 18L and 50L autoclaves.

The list below are the machines I supported;

- ★ Laboratory equipment
- ★ Theater equipment
- ★ Maternity/new born equipment
- ★ Dialysis and water plant

## **KENYA MEDICAL ENGINEERING LTD Nov 2018- March 2022**

- Tattenuer table autoclave and other medical devices repairs in our workshop.
- Medical gases piping installations
- Arranging for the effective distribution of marketing materials.
- Liaising and building relationships with a range of stakeholders like our clients.
- Supervising and offering mentorship to the biomedical technicians who came on internship.
- Practicing and showcasing a good leader qualities both to my juniors and seniors.
- Planning on when to carry out scheduled installations.

### **PCEA KIKUYU HOSPITAL Dec 2017– Nov 2018**

- Maintenance and Repair Covering;
- HDU and ICU Equipment, Operating Theatre Equipment
- Maternity and New Born unit. Kitchen and Laundry Equipment.
- Conducting daily checks on medical oxygen plant room and nitrous oxide
- Giving reports of critical equipment that need to be worked on quickly
- Advising fellow biomedical engineers on what to do about faulty medical device.
- Taking morning hospital rounds in the physiotherapy, theatre, HDU and maternity departments to record areas that need attentions.
- Carrying out installation, maintenance, inspection and testing and repairs of medical equipment.
- Providing biomedical support to the contractors on site when needed.
- Advising the physiotherapy department about the good use of the medical device and the cost it can bring when used carelessly.

### **AFFILIATIONS AND OTHER ROLES**

- Member of National Union of Biomedical Engineering Kenya
- Biomedical Volunteer at Migori Referral Hospital.
- Biomedical volunteer at Webuye District Hospital
- Worked as a data clerk for Dago Dala Hera CBO
